PROJECTS

1. **Foodigy (Food-delivering Webapp front-end using React.js) |**
   Tech Stack Used: React, JavaScript, HTML, CSS
   o "Foodigy" is a React based web-App that I created for practice.
   o The website features a ***configuration-driven user interface and utilizes the Swiggy API*** to fetch restaurant and menu data.
   o It is a demo website for a food delivering company, showcasing key features like a config-driven UI, routing, **Shimmer UI**.
   Code Link: VinamraSaurav/food-delivering-webApp-frontend
2. **Simple Bank Management System |** `Python, MySQL`
   o Used MySQL for handling as well as for storing user data.
   o Used Python as the base language for the development of the system as well as for creating user understandable interface/environment.

CERTIFICATES
